# Aristmas Begins Main Street"

Say there's Joan and Mary. And Si and Walt and Betty, too!

Just about everyone we know is down here tonight! And why not?

Surely Christmas begins right here on Main Street!

It begins in our shops and stores brimming with wonderful Christmes designed gift suggestions. Red wagons and construction sets, dolls and doll houses, golf clubs and sport shirts, cosmetic kits and boudoir lamps, television sets and new auto seat covers!

Yes, hundreds of "just what I want" items, all helping to usher in a most Merry, congenial, gay Christmas. And all within easy reach of everyone. No tiring traveling, no traffic tie-ups. No wasting gas or time or energy. It's just wonderful to have everything any of us need right here just around the corner!

And to top it all—our stores are open late evenings so that we can continue our shopping during the later hours, after our work. But remember. Time's a-fleeting, as one look at the calendar can tell is. Christmas is rushing on us rapidly and we had better get started if we want to be ready for Santa this Christmas Eve!

Everybody says: the shopping's

Because of the rugged nature of the terrain, particularly in the sarry stages

of the race, with roads narrower, curves sharper and graite there in some places that would be found on any main highway in the United States, this was a test of car stamina as well as of speed. It was particularly testing

on brakes and steering gear.

Chrysler was the only make, aside from the two Italian entries, that had more than one car in the first 11. This fact is all the more remarkable in that only 35 of the 97 cars that started survived the grind Siz Chryslers were among those that finished. This was a larger percentige of the starters than could be claimed by any other American make that had a large entry

The winner's time was 21 hours, 57 minutes, 52 seconds; giving him an average speed which is faster than was recorded in six of the first nine 500mile races on the Indianapolis Speedway. So is the time made by Starling in his Chrysler to take third place. These speeds were made undr conditions These speeds were made under conditions about as tough as could be found on a paved road anywhere so tough that only about a third of the starters could go all the way.

lic credit to provide an industrial plant to a corporation is full of dynamits and should be stopped one report said
BAWI officials—in the midet of the
biggest flood of inquires from Northern
industrialists in history—are baffled.
They don't know where the attack
started or where it is simed.

David M. Wood of New York one of the bond attorneys leading the campaign last week, played a major role in handl ing the first BAWI bond fesue for Armstrong Tire and Rubber Co. at Nat chez and a board spokesman says we have no reason to think he's soured on the program."

Best thinking here to date is that the action was directed at states and communities where bond issues are secured by a new industry's saming power—a hazer-lous financial risk sometimes.

This target would not effect Mississippi's plan since all BAWI bonds are backed by full faith and credit of cities or counties issuing them.

Usually the industry actually pays off the debt through rental payments but in some cases a city has built a plan in order to add a healthy new payroll to its trade channel and paid off the bonds it-

Also there are some who, remembering New England's howls of anguish in Congress and elsewhere over industry's trek Southward, believe the resolution was inspired by financial interests with the most to lose in those hard-hit areas.

Another possible future BAWI headache came in a quote from securities and exchange commission chairman H. A. McDonald

McDonald said if the expansion con-tinues it will "only be a matter of time" pefore Congress steps in.

He said the practice could be ended by congressional removal of tax exemption for municipal industrial bonds or by forcing the benefiting corporations to file a registration statement as is now required when issuing its own bonds.

Ironically the bankers acted as Mississippi is slowly moving into the second phase of its industrial development-loof a public bond issue.
